

“Knowledge Creates Confidence – Confidence Creates Success

COURSE SYLLABUS

A+/PC Repair

Course information

A+/PC Repair is a 192 clock hour course that is designed as an **“introductory”** Course for most IT courses and certifications.

Course Focus and Emphasis

Participants will be exposed to and learn all the knowledge and techniques used to become proficient in repairing, diagnosing, and troubleshooting the personal computer.

Participants will also be exposed to the latest developments in Core Hardware Structure, peripherals and supporting devices. They will also be exposed to many Operating systems. They will learn: Networking, internet safety, virus protection, printing, operating system support and troubleshooting.

Course and Career Objective

The course is designed to train students with the entry level skills necessary to enter the ever growing field of IT technology. Graduates will be employable either in computer stores, Private and public companies, repair shops, or computer assembly and installation companies.

SPECIAL EMPHASIS

A+ certification is a prerequisite for MCSA certification.
