

“Knowledge Creates Confidence – Confidence Creates Success”

COURSE SYLLABUS

CCDA(Cisco Certified Design Associate)

Course Information

CCDA is a 200 clock hour course that is designed to be the *foundation-level* Cisco certification course. It certifies that the participant has skills in designing routed and switched LAN, WAN and dial-access networks.

Course Focus and Emphasis

Focus and emphasis is placed on such things as designing Network/Cyber security, converged networks, Quality of Service (QoS), Virtual Private Networks (VPN) and Broadband Technology.

The **CCDA** certification (Cisco Certified Design Associate) indicates that the graduate has foundation or beginning apprentice knowledge of network design for the Cisco internet work infrastructure.

Course and Career Objective

CCDA Certified Professionals can enter into occupations where they can and will design routed and switched network infrastructures involving LAN,WAN, and Dial Access services for businesses and organizations.
